

## Eco-Inspired Design Story: Cosm

Cosm is a testament to the evolution of eco-inspired design at Herman Miller. Our legacy of clean chemistry, sustainable materials, and recyclability made it easier to put sustainability at the forefront of its design.

### **Cradle to Cradle™ Silver, SCS Indoor Advantage Gold, and BIFMA Level 3® Certified**

Drawing from a knowledge-base of sustainable design, Cosm continues our legacy. It's made with minimalistic materials that are safe for people and our world.

### **Leaf Arms: Foam-free Design**

Leaf Arms provide a large, comfortable resting place for your elbows and they don't get in the way of a desk when it's time to get back online. This foam free solution, frees the chair of potentially harmful chemicals and makes it easier to recycle at end of life.

### **Tilt Mechanism: Dematerialization**

Studio 7.5 and Herman Miller perfected the self-adjusting tilt by inventing a complex, finely tuned mechanism that gives you a feeling of weightlessness. Although fewer materials are used in the tilt, it instantly and automatically provides balance, support, and movement.

### **Aluminum Base: High Recycled Content**

The aluminum base version of the chair encourages the use of recycled materials along the supply chain and makes the chair easier to recycle at end of life.
