

Why did Herman Miller launch Nevi Link when Renew Link already exists?

With the introduction of Nevi Link, Herman Miller's sit-to-stand benching portfolio has greatly expanded, offering new levels of performance and price points to meet your customer's needs. Renew Link is our best in class bench that offers high performance and exceptional user experience. Nevi Link delivers Herman Miller quality and design at a more affordable price point with standard features that can scale up or down.

What product line code will Nevi Link follow?

The Nevi Link product line code is IL.

What is the Prime discount for Nevi Link?

Nevi Link Prime discount is 72%

Is Nevi Link available on GSA contract?

Yes, Nevi Link will be available on GSA contract at the start of order entry.

Is Nevi Link available on US Communities?

Yes, Nevi Link is available on US Communities.

Does Nevi Link have the same options as Renew Link?

No, Nevi Link does not have as many options as Renew Link. Nevi Link is available in a squared edge laminate or veneer work surface. For eased or thin edges, see Renew Link. There is no undersurface cable management available on Nevi Link, cable managers must be ordered separately. For more information, see the Nevi Link and Renew Link [comparison chart](#).

What are the height ranges for Nevi Link? (includes 1 ¼" worksurface)

Standard range: 28 ¼" to 47 ¼"

Extended range: 23 ¼" to 49 ¼"

What is the lift capacity of Nevi Link?

Nevi Link's lift capacity is 200lbs, which doesn't include the work surface. Make sure to subtract the weight of the work surface to get the true lift capacity of Nevi Link.

What work surface shapes does Nevi Link Offer?

Nevi Link offers a rectangular work surface. If you're looking for a trapezoid work surface to reduce visual distraction through sightlines, check out Renew Link.

What work surface widths can Nevi Link support?

Nevi Link can support rectangular work surfaces that are 48" – 72" wide.

What configurations are available with nevi Link?

Nevi Link is available in linear back-to-back and 120-degree applications. For single-sided benches, see Renew Link.

Nevi™ Link FAQ

What switches are available on Nevi Link?

Nevi Link offers the choice of the Simple Up Down switch (intuitive paddle) or the Simple Up Down Touch switch (with arrows). For a programmable control panel, see Renew Link.

Does Nevi Link have any integrated cable management?

No, Nevi Link does not include any integrated cable management within the product specification. However, there are Herman Miller solutions that can be ordered through Thrive or Canvas to support wire/cable management on Nevi Link.

What's the difference between the Basic Cable Trough (BCT) and the Enhanced Cable Trough (ECT)?

The Basic Cable Trough features an open central trough with a black interior to discretely hide cords that lay inside. The Enhanced Cable Trough features a hinged door that completely covers and conceals all cords that run through and has separate channels for power and data. It is important to note that both troughs are available on both benches.

Can Nevi Link support privacy and modesty screens?

Yes, Nevi Link can support a variety of surface-attached and trough-mounted screens including Pari, flat-edge, laminate, metal and glass screens. Nevi Link and Renew Link support the exact same screens. See planning guide for more information.

Can Nevi Link support monitor arms?

Yes, Nevi can support monitor arms easily. See [planning guide](#) for more information.

Does Nevi Link have any features to prevent the motor from overheating?

Nevi Link features Intelligent System Protection or (ISP). ISP is a software-based program that protects the electronic control system and motor from overload. A system or motor overload can occur if the table hits an obstruction. To eliminate this risk, ensure one-inch pinch points around the edge of the table and be sure nothing is obstructing the table's range of travel. Setting the minimum and maximum height limit for table travel on the switch will also help eliminate this risk.

How quickly does Nevi Link rise?

Nevi Link's speed is 1 3/8" per second.

What percentage of the population will Nevi Link support with a standard range leg?

The standard leg supports the 50th percentile female seated to the 90th percentile male standing.

What percentage of the population will Nevi support with an extended range leg?

The extended leg supports the 5th percentile female seated to the 95th percentile male standing.

Is Nevi Link compatible with Live OS?

No, for Live OS capabilities, see Renew Link.
